EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin K. Johanson on January 3, 2005.

The application has been amended as follows:

Claim 20 has been canceled to place this application in condition for allowance.

2. The following is an examiner's statement of reasons for allowance:

The present invention is directed to an apparatus for assisting in compressing video data in a computer system including a central processing unit and a system memory. Each independent claim identifies the uniquely distinct features: "a result buffer coupled to the operation unit, the result buffer further including a memory interface configured to couple with the system memory via a first bus independent of a second bus configured for coupling with the central processing unit via a north bridge chip, the result buffer for temporarily buffering the difference frame prior to storing the difference frame in the system memory, the apparatus configured to operate within the north bridge chip of the computer system to enable the central processing unit to retrieve the difference frame exclusive of the second bus and directly from the system memory via the north bridge chip for further compression of the video data by the

central processing unit". All the references of record, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
